<sup>1</sup> Maximum number of individuals that establishments can accommodate in a given moment, determined by the number of bed-places on offer. Double beds count as two. The annual value is an average, the same criteria being applied to the establishments in activity.

<sup>2</sup> It is obtained by dividing the total overnight stays by the number of bed-places on offer (counting double beds as two) times the number of days of that month. The change rate is in percentage points.

NOTE: As numbers are rounded up or down, totals may not always correspond to the sum of the parts.
