

Estimated of the global waste production in the Autonomous Region of Madeira

Unit: t

Items	Year
	2025
Solid waste production - total	384 538
For treatment in the solid waste treatment plant	150 435
Incineration	133 292
Clinical waste management	666
Organic waste valorization	7 621
Sanitary landfill	7 159
Tyre station	1 697
For recycling / valorization outside Madeira	38 098
Cardboard / Paper	11 706
Glass	6 767
Plastic and metal packaging	2 036
Waste electrical and electronic equipment (WEEE)	866
Scrap / Metals	10 148
Waste of end of life vehicles after dismantlement	3 431
Car batteries	721
Tyres	969
Batteries	6
Waste oils	907
Used cooking oils	541
Valorization in Madeira Island	14 833
Plastic	76
Agricultural valorisation/composting	51
Tyres	0
Construction and demolition waste	14 569
Woodchips	138
For treatment outside Madeira	1 344
Dangerous waste	1 248
Clinical waste (groups III+IV)	96
Deposition of Inert in Madeira Island	177 042
Construction and demolition waste	177 042
Porto Santo	3 851
Landfills	2 509
Inert waste landfill	2 206
Municipal waste landfill	303
Organic waste for the production of woodchips	1 342

Notes:

Overall production = For treatment in the solid waste treatment plant + For recycling outside Madeira + For treatment outside Madeira + Valorization in Madeira Island + Deposition of Inert in Madeira Island + Porto Santo - Tyres sent for Recycling (outside and inside Madeira) - Clinical waste (groups III + IV).

ETRS Meia Serra = MSW Incineration + HR Management + Sanitary Landfill + Tyre Station + Organic waste valorization.

Porto Santo = Organic Waste for Woodchip Production + Porto Santo Landfill (Inert landfill and Municipal waste landfill). □
